PROFESSIONAL SUMMARY

Backend Engineer with 4.8 years of experience designing and building scalable Go (Golang) microservices and distributed systems for fintech and real-time platforms. Specialized in event-driven architecture with NATS and Kafka, high-performance RESTful APIs, and concurrency, backed by PostgreSQL, MongoDB, and Redis. Owns backend services from design through production, delivering measurable gains in latency (up to 30%), API throughput, and transaction reliability.

TECHNICAL SKILLS

- **Languages:** Go (Golang), Node.js, Python
- **Backend:** Microservices Architecture, RESTful APIs, WebSockets, Distributed Systems, Event-Driven Architecture
- **Messaging & Streaming:** NATS, Kafka, Asynchronous Processing
- **Databases & Caching:** PostgreSQL, MongoDB, Redis, Query Optimization, Caching Strategies
- **Cloud & DevOps:** Docker, Kubernetes, CI/CD Pipelines
- **Observability & Reliability:** Structured Logging, Monitoring, Error Handling, High Availability
- **Core Concepts:** Concurrency, System Design, Performance Optimization, Scalability, API Security (Authentication, Authorization), Unit & Integration Testing, Agile

PROFESSIONAL EXPERIENCE

Tectoro Consulting Pvt Ltd – Golang Developer, India Jun 2024 – Present

- Designed and led development of scalable Go (Golang) microservices backed by MongoDB and Redis, owning backend services from design through production for fintech and real-time applications.
- Architected event-driven systems using NATS for reliable asynchronous processing, improving system responsiveness and resilience under high load.
- Optimized caching strategies, database queries, and inter-service communication, improving API throughput and reducing response times by up to 30%.
- Built high-performance RESTful APIs and real-time WebSocket services in Go, ensuring low latency and high availability.
- Implemented observability practices, including structured logging, monitoring, and standardized error handling, strengthening reliability and production stability.

BPS Pvt Ltd – Associate Software Engineer, India Sep 2023 – Jun 2024

- Developed and maintained Go microservices for payment platforms handling money transfer, AEPS, and recharge workflows.
- Designed RESTful APIs and integrated external financial services, improving transaction success rate by approximately 25% and reducing failure rates.
- Reduced latency by 20% through Redis-based caching and optimized inter-service communication.
- Containerized and deployed services with Docker and Kubernetes, enabling scalable and consistent environments.

Nouveau Labs – Software Engineer, India Apr 2022 – Feb 2023

- Built secure backend APIs for cloud security modules, implementing authentication, authorization, and data protection.
- Optimized request validation and middleware efficiency to improve API performance.
- Wrote unit and integration tests, improving code quality within Agile delivery.

Cognizant – Programmer Analyst Trainee, India Sep 2021 – Mar 2022

- Built backend modules and REST APIs for analytics applications, reducing response times by approximately 25%.
- Automated reporting workflows using Python, reducing manual effort by 40%.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering 2017 – 2021
Gayatri Vidya Parishad College of Engineering, Visakhapatnam GPA: 8.1/10
