SUMMARY

Backend Engineer with **4.6 years of experience** designing and building scalable microservices and distributed systems using Golang, MongoDB, PostgreSQL and event-driven architectures. Expertise in building high-performance REST APIs, implementing asynchronous messaging systems (NATS), and optimizing system performance, scalability, and reliability. Proven track record of delivering production-ready solutions in fintech and real-time platforms with a strong focus on concurrency, caching, and system design.

SKILLS

- **Programming Languages:** Golang, Node.js
- **Backend Development:** RESTful APIs, Microservices Architecture, Distributed Systems
- **Databases & Caching:** MongoDB, PostgreSQL, Redis
- **Messaging & Event Streaming:** NATS (Event-Driven Architecture), Kafka
- **Infrastructure & DevOps:** Docker, Kubernetes, CI/CD Pipelines
- **Core Concepts:** Concurrency, Performance Optimization, System Design, Observability, Scalability, Reliability

TECHNICAL EXPERIENCE

Tectoro Consulting Pvt Ltd

Golang Developer — June 2024 – Present

- Designed and led the development of scalable backend services using Golang, MongoDB, and Redis for fintech and real-time applications.
- Built event-driven architectures using NATS, enabling reliable asynchronous processing and improved system responsiveness under high load.
- Built high-performance REST APIs and real-time communication services (WebSockets), ensuring low latency and high availability.
- Optimized caching strategies, database queries, and service interactions, improving API throughput and reducing response time by up to 30%.
- Implemented observability practices including structured logging, monitoring, and error handling, enhancing system reliability and production stability.

BPS Pvt Ltd

Associate Software Engineer — Sept 2023 – June 2024

- Enhanced and maintained microservices for payment platforms supporting money transfer, AEPS, and recharge workflows using Golang.
- Designed RESTful APIs and integrated external financial services, improving transaction success rate by approximately 25% and reducing failure rates.
- Enhanced application performance through Redis-based caching and optimized inter-service communication, reducing latency by 20%.
- Contributed to containerization and deployment workflows using Docker and Kubernetes, enabling scalable and consistent environments.

Nouveau Labs

Software Engineer — April 2022 – Feb 2023

- Built secure backend APIs for cloud security modules, ensuring authentication, authorization, and data protection.
- Optimised request validation, middleware efficiency, and API performance.
- Wrote unit and integration tests, improving code quality and supporting Agile development practices.

Cognizant

Programmer Analyst Trainee — Sept 2021 – March 2022

- Built backend modules and REST APIs for analytics applications, improving data processing efficiency and reducing response times by approximately 25%.
- Automated reporting workflows using Python, reducing manual effort by 40% and improving operational efficiency.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering

2017 – 2021

Gayatri Vidya Parishad College of Engineering, Visakhapatnam

GPA: 8.1/10
